ANNUAL REPORT OF THE BOARD OF TRUSTEES

[illegible]

▶ **RESEARCH** The authors used a cross-sectional design to examine the prevalence of self-reported depression and anxiety among a sample of 1,000 U.S. adults. The study was conducted using a nationally representative sample of the general population, and the data were collected through a series of telephone interviews.

At the same time, the *Journal of the American Medical Association* (JAMA) published a letter from the American Medical Association (AMA) to the JAMA editor, dated June 1, 1968, in which the AMA expressed its opposition to the proposed legislation. The AMA letter stated that the proposed legislation would "interfere with the freedom of the medical profession to practice medicine as they see fit" and that it would "impose a heavy burden on the medical profession to prove that it is not in the public interest to regulate the practice of medicine."
